

HOMERWOOD®
— THE PREMIUM HARDWOOD —

Style FOR LIFE.

Appalachian Hardwood, lovingly handcrafted into the finest American-made hardwood floors — The Essence of HomerWood®. Recalling the age of quality and craftsmanship, we hand select each plank from sustainable, center-cut lumber to reveal the character and unsurpassed beauty created by nature. From these planks we handcraft and custom design exceptional hardwood floors for those who seek style, elegance and individuality. That's why, quite simply, there is no finer choice for your home than a HomerWood Premium hardwood floor.

Our classic to contemporary designs offer truly spectacular floors in a range of beautiful species, colors, styles, textures and surface treatments to suit any personality or lifestyle. Made in America, from American hands and hearts to your home, each plank is a reflection of who we are and the quality of work we do.

That's why you can trust your home to HomerWood.

Premium

TRADITIONAL CHARACTER™

Our Traditional Character floors, handcrafted from desirable center-cut lumber, reveal all of the trees' natural beauty, and preserve the distinctive graining and inherent characteristics created by nature. Featuring both clear and character planks, the result is a stylish, elegant floor.

Your home is an expression of your individual style, a reflection of your unique personality, and when it comes to décor, you simply want the very best. Why settle for anything less, consider HomerWood the perfect choice.

AMISH HAND-SCRAPED®

HomerWood's Amish Hand-Scraped floors offer an exceptionally striking, one-of-a-kind look. A true work of art, each premium plank is uniquely hand-scraped by experienced Amish craftsmen, whose creativity combined with nature assures that no two planks are the same — a highly desirable feature of our hand-scraped floors.

And, as with any artist, each plank proudly bears the signature of the craftsman who created it. Our traditional Amish scrape covers the full surface of the floor and creates a richly textured appearance that is warm and appealing, enhancing every style of décor from classic to contemporary.

AMISH SOFT SCRAPED

As with our traditional scrape, local Amish craftsmen expertly hand-scrape each individual plank to create a unique, subtle, timeworn look that is unmatched in its classic beauty. To complete the sculpted look, the plank ends are pillowed by hand, and each plank proudly bears the signature of the craftsman who created it. The result is a floor of timeless beauty that defines quality, luxury and style, adding warmth to any room.

SMOKED SPECIALTIES™

Our Smoked Specialties floors offer dramatic, rich and alluring visual elements that add design and depth to a room. The natural figuring of the grain is accented by gently flaming the wood,

board by board. The heat from the open flame caramelizes the sugars in the sapwood, creating a shadowed look that can't be imitated. A true work of art, created exclusively by HomerWood.

WIRE BRUSHED

Texture has long been an important interior design element, as it seduces the eye and adds dimension to a living space. Wire brushing is a subtle texturing technique that enhances the

soft grain, creating a seasoned appearance. The look can be further enhanced with a liming technique that infuses the soft grain and adds a contrasting color.

ABOUT OUR FLOORING

Our Character Styles

HomerWood pioneered the word "Character" to describe our use of the entire log to show all the wood's inherent characteristics and natural beauty in our floors. The very fingerprints of nature have been beautifully and reassuringly preserved. These unique naturally occurring characteristics may include an array of open and filled knots, original markings, splits, checking, sap, pith, mineral streaks, color variations, embodied cracks, and variations in grain. The wood's appearance determines its style or grade, and markings may vary with each width. The end result is an elegant floor that reveals all of the trees' natural characteristics.

Our Prime Styles

Our Prime floors feature natural inherent characteristics, however, we've taken special care to limit the size, amount and frequency. Prime floors highlight select, unique characteristics that are visually modest and give these floors a cleaner appearance overall.

Our Finishes

Our UV-Cured Urethane with Aluminum Oxide features a proprietary cross-polymer additive that provides superior wear properties. All materials are solvents, volatile free and create no emissions. Our finish provides long-lasting beauty with superior clarity that allows the natural beauty of the grain to show through. You can see and feel the difference!

Our UV Oil is a two-coat, factory-applied oil that is cured with UV lights and ready to install. This penetrating Oil finish provides natural beauty with no oily residue that is easy to refresh and repair.

Our Warranty

HomerWood offers a Lifetime Structural Warranty on all of our floors. Our UV-Cured Urethane floors carry a 50-year residential finish warranty and a 3-year commercial finish warranty. As our UV-Cured Oil finish is absorbed into the wood, our finish warranties do not apply.

For warranty details, visit homerwood.com.

Environmentally Friendly

HomerWood purchases raw material from suppliers who employ only the highest standards in forestry practices, thus assuring the conservation and replenishment of our forests. HomerWood floors are produced with zero waste, are Carb II compliant with zero off-gassing, no urea-formaldehyde and no VOCs. HomerWood is a zero-waste manufacturer, and all wood fiber from the manufacturing process is utilized, right down to the tiniest particle of sawdust.

HomerWood Disclaimer: Due to printing limitations and natural color variations in raw wood, colors pictured cannot be guaranteed to match actual stained flooring material. In addition, it is impossible to portray the complete array of natural characteristics and color variation that may occur in hardwood and which will make your HomerWood floor truly one-of-a-kind. Room scenes, pictures and hardwood floor samples are intended as a visual guide reference and not as the actual representation of the hardwood floor itself. Since every tree provides us with its own unique natural characteristics, your newly installed floor may vary from samples or pictures shown. Natural color variation in raw material will dictate the final shade of stain. Wood will react to changes in moisture and humidity. In order for your floor to perform properly, indoor humidity should be maintained between 30%-50% year round. We recommend following NWFA guidelines and the use of an NWFA-certified installer.

HOMERWOOD®

— THE PREMIUM HARDWOOD —

Cover Image: Our cover features a North American Hard Maple tree typically found in the Appalachian region. Trees that grow in this region are “Slow Growth,” which means they are dormant in the winter months, and will only grow up to 12 inches in the spring, summer and fall growing season and therefore take years to come into maturity. HomerWood carefully selects its lumber from only slow-growth trees, as these produce a more stable cut of wood, with beautiful heartwood and a very tight graining pattern.
